Telangana Bio-fertilizers (Monitoring and Quality Control) Act, 2006

Act 6 of 2006

- Published on 30 December 2005
- Commenced on 30 December 2005
- [This is the version of this document from 30 December 2005.]
- [Note: The original publication document is not available and this content could not be verified.]

Telangana Bio-fertilizers (Monitoring and Quality Control) Act, 2006(Act No. 6 of 2006)Last Updated 28th January, 2020The Andhra Pradesh Bio-fertilizers (Monitoring and Quality Control) Act, 2006 received the assent of the Governor on the 30th December, 2005. The said Act in force in the combined State, as on 02.06.2014, has been adapted to the State of Telangana, under section 101 of the Andhra Pradesh Reorganisation Act, 2014 (Central Act 6 of 2014) vide. the Telangana Adaptation of Laws Order, 2016, issued in G.O.Ms.No.45, Law (F) Department, dated 01.06.2016.Chapter - I Preliminary

1. Short title, extent and commencement.

(1)This Act may be called the [Telangana] [Substituted by G.O.Ms.No.45, Law (F) Department, dated 01.06.2016.] Bio-fertilizers (Monitoring and Quality Control) Act, 2006.(2)It extends to the whole of the State of [Telangana] [Substituted by G.O.Ms.No.45, Law (F) Department, dated 01.06.2016.].(3)It shall be deemed to have come into force with effect on and from the 21st November, 2005.

2. Definitions.

- In this Act, unless the context otherwise requires, -(1)'Bio-fertilizer' means a inert material containing microbial inoculants (living organism) as specified in Schedule I;(2)'Certificate of Source' means a certificate issued by the Government or as the case may be, the Manufacturer to the Dealer indicating the source from Bio-fertilizer for purpose of sale is obtained;(3)'Controller' means the person appointed as Controller of Bio-fertilizer by the Government and includes any other person empowered by the Government to exercise or perform all or any of the functions as may be prescribed;(4)'Dealer' means a person carrying on the business of selling Bio-fertilizers and includes

a manufacturer and an agent carrying on such business;(5)'Government' means the State Government;(6)'Grade' means the living organism contents in Bio-fertilizer expressed in number of cells / gram of carrier material / milliliter of liquid Bio-fertilizer;(7)'Inspector' means an Inspector appointed under section 19 of the Act;(8)'Label' means any written, printed or graphic matter on the package and any other covering in which the package is placed or packed and includes any written, printed, or graphic matter accompanying the Bio-fertilizer;(9)'Manufacturer' means a person who produces Bio-fertilizers and expression manufacturer with its grammatical variations shall be construed accordingly;(10)'Non-standard Bio-fertilizer' means,-(i)if its label contains any statement, design or graphic statement/representation thereto which is false or misleading in any material particular, or if its package is otherwise deceptive in respect of its contents; or(ii)if it is an imitation of, or is sold under the name of another Bio-fertilizer; or(iii)if any word, statement or other information required by or under this Act to appear on the label is not displayed thereon in such conspicuous manner as the other words, statements or graphic matter have been displayed on the label and in such terms as to render it likely to be read and understood by any ordinary individual under customary conditions of purchase and use; or(iv)if it is not packed and labeled as required by or under this Act; or(v)if it is not registered in the manner required by or under this Act; or(vi)if the label contains any reference to registration other than the registration number; or(vii)if the bio-fertilizer is not in conformity with the prescribed standards as specified in section 2 (16) of this Act and packed with any substance which is not included in the registration;(11)'Notification' means a notification published in the [Telangana] [Substituted by G.O.Ms.No.45, Law (F) Department, dated 01.06.2016.] Gazette and the word 'notified' shall be construed accordingly;(12)'Offer for sale' includes a reference to intimation by a person and a person who proposed for sale, exhibit the price list, indicating the prices of Bio-fertilizer;(13)'Package' means a box, bottle, casket, tin, barrel, case, receptacle, sack, bag wrapper or other thing in which a bio-fertilizer is placed or packed;(14)'premises' means any land, shop, stall or place where any bio-fertilizer is manufactured or stored or sold or used and includes any vehicle carrying bio-fertilizers;(15)'prescribed' means prescribed by rules made under this Act;(16)'Prescribed standard' means prescribed under this Act;(17)'Registering Authority' means a registering authority appointed under section 18;(18)'Schedule' means the Schedule appended to this Act;(19)'State' means the State of [Telangana] [Substituted by G.O.Ms.No.45, Law (F) Department, dated 01.06.2016.].Chapter - II
Price Control

3. Fixation of prices of Bio-fertilizers.

(1)The Government may by notification regulate equitable distribution and also the rates of Bio-fertilizers in the manner as may be prescribed.(2)The Government may having regard to the local conditions of any area, the period of storage of Bio-fertilizers, and other relevant circumstances, fix different prices or rates for Bio-fertilizers having different periods of storage or for different classes of consumers.(3)No dealer or manufacturer shall sell or offer for sale any bio-fertilizer at a price exceeding the maximum price or rate fixed under this Act or printed on the container.

4. Display of Stock Position and Price List.

- Every dealer, who makes or offers to make a sale of any place of business, -(i)the quantities of opening stock of different Bio-fertilizers held by him on each day;Explanation. - The actual stocks at any point of time during the day may be different from that of the displayed opening stock to the extent of sale and receipt of such Bio-fertilizers up to the time of inspection during the day;(ii)a list of prices or rates of such Bio-fertilizers fixed under section 3 or the Maximum Retail Price printed on the container by the manufacturer.

5. Issue of cash or credit memorandum.

- Every dealer shall issue a cash or credit memorandum to a purchaser of bio-fertilizer in the manner prescribed.

6. Control on distribution of Bio-fertilizers by manufacturers.

- The Government may by notification direct any manufacturer, to secure equitable distribution and availability of bio-fertilizer to the farmers in time, to sell the bio-fertilizers produced by any person in such quantities in such areas of the State and within such periods as may be specified in the notification.

7. Dealers to be registered.

- No person including manufacturer / dealer shall offer for sale or carry on business for selling Bio-fertilizers at any place except under and in accordance with terms and conditions of its certificate of registration granted to any person as prescribed under section 8 of this Act:Provided that the Government may if it considers necessary or expedient by notification exempt from the provisions of this section any person selling Bio-fertilizers to the farmers in such areas and subject to such conditions as may be specified in that notification.

8. Application for Registration.

(1)Every person desiring to obtain a Certificate of Registration under this Act for manufacturing Bio-fertilizers by a manufacturer shall make an application for registration to the Registering Authority or the Controller in the manner prescribed.(2)Every person desiring to obtain a Certificate of Registration under this Act for selling Bio-fertilizers by a Dealer shall make an application for registration to the Registering Authority together with the fee in the manner prescribed:Provided that where the applicant is a Government or a manufacturer, it shall not be necessary to enclose a certificate of source along with the application:Provided further that where Bio-fertilizer, are obtained for sale from different sources, a certificate of source from each such source shall be furnished in the manner prescribed:Provided also that a dealer, except a manufacturer shall not issue a certificate of source to authorize another dealer for dealing in Bio-fertilizer.

9. Grant or refusal of Certificate of Registration.

- The Registering Authority or as the case may be the Controller shall grant a Certificate of Registration, within 30 (thirty) days of the receipt of the application to any person in the manner prescribed: Provided that no Certificate of Registration shall be granted to a person, - (i) if his previous Certificate of Registration is under suspension; or (ii) if his previous Certificate of Registration has been cancelled within a period of one year immediately preceding the date of making the application; or (iii) if he has been convicted of any offence under this Act or any order made thereunder within three years immediately preceding the date of making the application; or (iv) if he fails to enclose with the application, a certificate of source; or (v) if the application is incomplete in any respect.

10. Period of validity of Certificate of Registration.

- Every Certificate of Registration granted under section 9 or as the case may be renewed under section 11 unless suspended or cancelled shall be valid for a maximum period of 3 (three) years from the date of issue.

11. Renewal of Certificate of Registration.

(1) Every holder of a Certificate of Registration desiring to renew the Certificate of Registration granted under section 9 shall, before the date of expiry of such certificate of registration make an application for renewal to the Registering Authority or as the case may be, to the Controller as may be prescribed in duplicate, together with the fee prescribed under section 30 of the Act for such renewal and a certificate of source as required under section 8 of the Act. (2) On receipt of such application together with such fee and certificate of source, the Registering Authority, or as the case may be, the Controller may renew the Certificate of Registration as may be prescribed: Provided that a Certificate of Registration shall not be renewed if the holder of the Certificate of Registration did not sell any Bio-fertilizer during the period of one year immediately preceding the date of expiry of the period of validity of the Certificate of Registration sought to be renewed. (3) If any application for renewal is not made before the expiry of the period of validity of the Certificate of Registration but is made within one month from the date of such expiry, the Certificate of Registration may be renewed on payment of such additional fee as may be prescribed by the Government, or as the case may be the Controller, in addition to the fee for renewal of the certificate of registration. (4) Where the application for renewal is made within the time specified in sub section (1) or sub section (3) the applicant shall be deemed to have held a valid Certificate of Registration, until such date as the Registering Authority or as the case may be the Controller passes orders on the application for renewal. (5) If an application for renewal of a Certificate of Registration is not made within one month from the date of expiry of the period of validity of the Certificate of Registration, the Certificate of Registration shall be deemed to have lapsed on the date on which its validity expired and any business carried on or after that date shall be deemed to have been carried on in contravention of section 7 of the Act. Chapter - IV Restriction on Manufacture, Sale etc of Bio-fertilizers

12. Restriction on manufacture, sale and distribution of Bio-fertilizers.

(1) No person shall himself or by any other person on his behalf, - (i) manufacture for sale, sell, offer for sale, stock or exhibit for sale or distribute any Bio-fertilizer which is not of prescribed standard; (ii) manufacture for sale, sell, offer for sale, stock or exhibit for sale, or distribute any Bio-fertilizer, which is not of prescribed standard and which does not conform to the particulars specified in the certificate of manufacture granted to him under this Act in respect of Bio-fertilizers; (iii) sell, offer for sale, stock or exhibit for sale or distribute, - (a) any Bio-fertilizer, the container whereof is not packed and marketed in the manner laid down in this Act; (b) any Bio-fertilizer which is an imitation or substitute for another Bio-fertilizer under the name of which it is sold; (c) any Bio-fertilizer which is adulterated. Explanation - A Bio-fertilizer shall be deemed to be adulterated, if it contains any substance addition of which is likely to eliminate or decrease the living organisms or make the fertilizer not conforming to the prescribed standard; (d) any Bio-fertilizer, the label or container whereof bears the name of any individual, firm or company purporting to be manufacturer of the Bio-fertilizer, which individual, firm or company is fictitious or does not exist; (e) any Bio-fertilizer, the label or container whereof or anything accompanying therewith bears any statement which makes a false claim for the Bio-fertilizer or which is false or misleading in any material particular; (f) any substance purported to be a Bio-fertilizer which substance is not, in fact, a Bio-fertilizer; or (g) any bio-fertilizer, which is not properly labeled by exhibiting the minimum guaranteed count of living organisms. (2) Any manufacturer who intends to manufacture for sale / offer for sale / stock, or exhibit for sale or distribute any bio-fertilizer other than those specified in the Scheduled-I shall make an application to the prescribed authority and the same shall be scrutinised by the Technical Committee appointed for this purpose by the Government and he recommended to the Government for final orders by notification by the Government in the manner prescribed.

13. Manufacturers to comply with certain requirements for Laboratory facility.

- Every manufacturer shall in order to ensure the quality of their product possess minimum lab facility as may be specified from time to time by the Controller.

14. Bulk sale of Bio-fertilizers.

- Notwithstanding anything contained in this Act, - (i) a dealer shall not retain any container of any variety of Bio-fertilizer in an open and unsealed condition for the purpose of sale; (ii) the Government may by notification authorize a manufacturer to sell any Bio-fertilizer manufactured by him in bulk also direct to the farmers for such period as may be specified in that notification: Provided that a certificate indicating the minimum guaranteed living cells be issued by the manufacturer to each farmer at the time of such sale.

15. Disposal of nonstandard Bio-fertilizers.

(1) Notwithstanding anything contained in this Act, no person shall sell or offer for sale, stock,

exhibit for sale or distribute, any Bio-fertilizer which does not conform to the prescribed standards unless the Bio-fertilizer is reprocessed by the manufacturer under the supervision of enforcing authorities, in the manner prescribed.

16. Manufacturers to appoint officers responsible for compliance of the Act.

- Every manufacturing organization shall, in consultation with the Government, appoint an officer in that organisation who shall be responsible for compliance with the provisions of this Act.

17. Restriction of sale/use of Bio-fertilizers.

- No person shall, except with prior permission of the Government, and subject to such terms and conditions as may be imposed by the Government, sell or use Bio- Fertilizers for purposes other than fertilization of soils and increasing productivity of crops.

18. Appointment of Controller and Registering Authority.

(1)The Government may by notification appoint an officer as the Controller, for the purposes of this Act.(2)The Government may by notification appoint such number of persons as it thinks necessary, to be the registering authorities for the purposes of this Act and may in any such notification define the limits of the local area within which each such registering authority shall exercise his jurisdiction.

19. Appointment of Inspectors.

- The Government may by notification appoint such number of persons, as it thinks necessary to be Inspectors of Bio-fertilizers for the purpose of this Act, and may in such notification define the limits of local area within which each such Inspector shall exercise his jurisdiction.

20. Qualification for appointment of Inspectors.

- No person shall be eligible for appointment as Bio-fertilizer Inspector, under this Act unless he possesses the qualification namely Graduation in Agriculture from a recognized University and working in the Department of Agriculture, in the State.

21. Powers of Inspectors.

(1)An Inspector may with a view to securing compliance with this Act,-(i)require any manufacturer or a dealer to give any information in his possession, with respect to the manufacture, storage and disposal of any Bio-fertilizer manufactured or in any manner handled by him;(ii)draw samples of any Bio fertilizer in accordance with the procedure for drawal of samples laid down in schedule II:Provided that the Inspector shall prepare the sampling details in duplicate as may be prescribed and hand over one copy of the same to the dealer or his representative from whom the sample has

been drawn;(iii)enter upon and search any premises where any Bio-fertilizer is manufactured or stored or exhibited for sale, if he has reason to believe that any Bio-fertilizer has been or is being manufactured, sold, offered for sale, stored, exhibited for sale or distributed contrary to the provisions of this Act;(iv)seize or detain any Bio-fertilizer, in respect of which he has reason to believe that a contravention of this Act has been or is being or is about to be committed;(v)seize any books of accounts or documents relating to manufacture, storage or sale of Bio-fertilizer etc., in respect of which he has reason to believe that any contravention of this Act has been or is being or is about to be committed:Provided that the Inspector shall give a receipt for such Bio-fertilizers or books of accounts or documents so seized to the person from whom the same has been seized:Provided further that the books of accounts or documents so seized shall be returned to the person from whom they were seized after copies thereof or extracts therefrom as certified by such person, have been taken:Provided also that the Inspector shall give the stop sale notice in writing to the person whose stocks have been detained and initiate appropriate action as per the provisions of this Act or the rules made thereunder within a period of twenty one days. If no action has been initiated by the Inspector within the said period of twenty one days from the date of issue of the said notice, the notice of stop sale shall be deemed to have been revoked.(2)Where any Bio-fertilizer is seized by any Inspector under this section he shall forthwith report the fact of seizure to the respective Magistrate and seek further orders.

Chapter - VI Analysis of Samples

22. Analysis of samples.

- Bio-fertilizer samples drawn by an Inspector shall be analyzed in accordance with the standards laid down in Schedule - I as per the specifications of Bureau of Indian Standards.

23. Qualification for appointment of Bio-fertilizer Analyst in the Bio-fertilizer Control Laboratories.

- No person shall be eligible for appointment as Bio-fertilizer analyst for analysis of Bio-fertilizer samples in the laboratories as may be notified for the purposes of this Act, unless he possesses the qualification namely Graduation in Agriculture from a recognized University with training in Bio-fertilizers quality control and analysis at National Centre for Organic Farming, Ghaziabad, or its regional centres:Provided that the Bio-fertilizer analysts appointed before the commencement of this Act, who do not possess the requisite training, shall undergo the prescribed training within a period of one year at National Centre for Organic Farming, Ghaziabad, or its regional centres.

24. Time limit for analysis and communication of results.

(1)Where a sample of Bio-fertilizer has been drawn, the same shall be dispatched along with memorandum in the manner prescribed to such laboratory as may be notified for analysis within a period of 7 (seven) days from the date of its drawal.(2)The Laboratory shall analyse the sample and forward the analysis report in the form as may be prescribed within 30 (thirty) days from the date of receipt of the sample in the laboratory to the authorities specified in the said memorandum.(3)The authority to whom the analysis report is sent under sub-section (2) shall communicate the result of

analysis to the dealer/manufacturer from whom the sample was drawn within 15 (fifteen) days from the date of receipt of analysis report.(4)The report of the Laboratory is final for initiating any criminal proceedings against the dealer / manufacturer.Chapter - VII Miscellaneous

25. Suspension/ cancellation of Registration Certificate.

(1)A registering authority or, as the case may be the Controller may, after giving the holder of a certificate of registration, or a certificate of manufacture or any other certificate granted under this Act, an opportunity of being heard, suspend or cancel such certificate on any of the following grounds, namely:-(i)that such certificate has been obtained by fraud or misrepresentation as to material particulars;(ii)that any of the provisions of this Act or any of the terms and conditions of such certificate has been contravened or not fulfilled:Provided that while cancelling the certificate the holder thereof may be allowed a period of 30 (thirty) days to dispose of the balance stock of bio-fertilizers if any held by him:Provided further that the stock of Bio-fertilizer lying with the holder after the expiry of the said 30 (thirty) days period shall be confiscated.(2)Where the contravention alleged to have been committed by a person is such as should, on being proved, justify cancellation of the certificate of registration or, as the case may be certificate of manufacture or any other certificate granted under this Act to such person the registering authority or as the case may be, the Controller may without any notice, suspend such certificate as an interim measure:Provided that the registering authority, or as the case may be the Controller shall immediately furnish to the affected person/persons details and the nature of contravention alleged to have been committed by such person/persons and, after giving the person/persons an opportunity of being heard, pass final orders either revoking the order of suspension or cancelling such certificate within fifteen days from the date of issue of the order of suspension:Provided further that where no final order is passed within the period as specified above, the order of interim suspension shall be deemed to have been revoked without prejudice, however to any further action which the Registering authority or, as the case may be the Controller may take against the holder of the Certificate of Registration under sub-section (1).(3)Whenever a certificate is suspended or cancelled under this section, the registering authority or as the case may be, the controller shall record a brief statement of reasons for such suspension or, as the case may be cancellation and furnish a copy thereof to the person whose certificate has been suspended or cancelled.(4)Whenever a person is alleged to have committed the contravention, the registering authority shall, within a period of fifteen days from the date of issue of such order of suspension or cancellation furnish to the Controller also, besides sending the same to the person whose certificate has been suspended or cancelled, a detailed report about the nature of contravention committed and a brief statement of the reasons for such suspension or, as the case may be cancellation:Provided that the Controller, shall in case of the order of suspension passed by the registering authority, on receipt of the detailed report and after giving the person an opportunity of being heard, pass final order either revoking the order of suspension or cancelling the certificate of registration, within fifteen days from the date of receipt of the detailed report from the registering authority, failing which the order of interim suspension passed by the registering authority shall be deemed to have been revoked, without prejudice however to any further action which the Controller may take against the holder of Certificate of Registration under sub-section (1):Provided further that the order of cancellation passed by the registering authority shall remain effective as if it has been passed by the Controller till such time

the Controller, on receipt of the detailed report from the registering authority and if deemed necessary after giving the person a fresh opportunity of being heard, pass the final order either revoking or confirming the order of cancellation.

26. Appeal.

- Any person aggrieved by any of the following orders or action of registering Authority or as the case may be the Controller may appeal to such authority as may be prescribed by the Government,-(i)refusing to grant, amend or renew the certificate of registration for sale of Bio-fertilizers;(ii)refusing to grant a Certificate of Manufacture for production of Bio-fertilizers;(iii)suspending or cancelling a Certificate of Registration of a manufacturer/dealer;(iv)Non issuance of Certificate of Registration to any person within a period of 60 (sixty) days from the date of receipt of such order or as the case may be from the date of expiry of such stipulated period, and the decision of such authority shall be final.

27. Grant of duplicate copies of Certificate of Registration etc.

- Where a Certificate of Registration or a Certificate of Manufacture or any other certificate granted or as the case may be, renewed under this Act is lost, torn or spoiled or defaced as the case may be, the registering authority or as the case may be, the Controller may on an application made in this behalf together with the fee prescribed for the purpose under section 30 of the Act grant a duplicate copy of such certificate.

28. Amendment of Certificate of Registration.

- The registering authority or as the case may be the Controller may amend the Certificate of Registration on an application made in this behalf together with the fee as prescribed under section 30 of the Act.

29. Maintenance of Records and submission of returns etc.

(1)The Controller may by an order made in writing direct the dealer / manufacturer,-(i)to maintain such books of accounts, records etc, relating to their business in form as may be prescribed; and(ii)to submit to such authority, returns and statements in such form and containing such information relating to their business and within such time as may be specified in this Act.(2)Where a person holds Certificate of Registration for sale of Bio-fertilizers, he shall maintain separate books of Accounts for the sales made by him.(3)Where the Government or a manufacturer holds a valid Certificate of Registration for sale of Bio-fertilizers, they shall maintain separate books of accounts for the sales made by them.

30. Fees.

(1)The fees payable for grant, amendment or renewal of Certificate of Registration or Certificate of Manufacture or grant of a duplicate of such certificates or renewal thereof under this Act shall be such as the Government may from time to time fix for different purposes.(2)The authority to whom and the manner in which the fee fixed under sub-section (1) shall be such as may be notified by the Government.(3)Any fee paid under sub-section (1) shall not be refundable unless the grant or renewal of any Certificate of Registration or Certificate of Manufacture or grant of duplicate copy of such certificate or renewal under this Act has been refused.

31. Offences and penalties.

(1)Whoever,-(i)manufactures, sells, stocks or exhibits for sale or distributes any Bio-fertilizer deemed to be non-standard under section 2 (10); or(ii)manufactures, sells, stocks or exhibits for sale or distributes a Bio-fertilizer without a Certificate of Registration; or(iii)manufactures, sells or distributes a Bio-fertilizer in contravention of section 12; or(iv)obstructs a Bio-fertilizer Inspector in the exercise of his powers or discharge of his duties under this Act, shall be punishable,-(a)for the first offence, with imprisonment for a term which may extend to one year or with fine which may extend to rupees fifty thousand or with both;(b)for the second and subsequent offence with imprisonment for a term which may extend to two years or with fine which may extend to rupees one lakh, or with both.(2)Whoever contravenes any other provisions of this Act or any condition of Certificate of Registration granted thereunder shall be punishable,-(a)for the first offence with imprisonment which may extend to six months or with fine which may extend to five thousand rupees or with both;(b)for the second and subsequent offence with imprisonment for a term which may extend to two years, or with fine which may extend to twenty thousand rupees or with both.(3)If any person convicted of an offence under this Act commits a like offence after-wards, it shall be lawful for the Court before which the second or subsequent conviction takes place to cause the offenders name and place of residence, the offence and penalty imposed to be published in such newspapers or in such other manner as the court may direct.

32. Protection of action taken in good faith.

- No suit, prosecution or other legal proceedings shall lie against the Government or any officer, authority or person empowered to exercise the powers and perform the functions by or under this Act for anything which is done in good faith or intended to be done under this Act or the rules or orders made thereunder.

33. Power to remove difficulties.

- If any doubt or difficulty arises in giving effect to the provisions of this Act, the Government may, by order make such provisions or give such directions not inconsistent with the provisions of this Act as may appear to it to be necessary or expedient for removal of doubt or difficulty.

34. Power to make rules.

(1)The Government may, by notification, make rules for carrying out all or any of the purposes of this Act.(2)Every rule made under this Act shall immediately after it is made, be laid before the Legislature of the State, if it is in session and if it is not in session, in the session immediately following for a total period of fourteen days which may be comprised in one session or in two successive sessions, and if, before the expiration of the session in which it is so laid or the session immediately following, the Legislature agrees in making any modification in the rule or in the annulment of the rule, the rule shall, from the date on which the modification or annulment is notified, have effect only in such modified form or shall stand annulled as the case may be, so however, that any such modification or annulment shall be without prejudice to the validity of anything previously done under that rule.

35. Repeal of Ordinance 23 of 2005.

- The Andhra Pradesh Bio-fertilizers (Monitoring and Quality Control) Ordinance, 2005 is hereby repealed.

I

[See section 2(1)]Part - A Specifications of Bio-fertilizers

1. Nitrogen Fixing Bio-fertilizers:-

a. Rhizobium Inoculants (RI) (IS 8268 - 2001)i. RI shall be carrier based, the colour depending on the colour of the carrier.ii. RI shall contain a minimum of 10⁷ viable Rhizobium cells/g of the carrier on dry - mass basis till 6 months expiry period from the date of manufacture. The number shall be counted by the plate count method as given in 4.2 and 4.3 of 1A of Part B of Schedule - II.iii. RI shall have a maximum of six months expiry period from the date of manufacture.iv. RI shall have no contamination with other microorganisms at 10⁵ dilution when counted as given in 4.3 of 1A of Part B of Schedule - II.v. The pH of RI shall be between 6.5 and 7.5 when tested as given in Annexure-A.vi. RI shall show effectiveness nodulation on all those species and / or cultivars on the packet before the expiry date when tested. If good effectiveness pink nodulation is obtainable in the inoculated species together with total absence or sometimes presence of stay nodules in the controls, it should be concluded that RI contains effective Rhizobium. The total dry mass of inoculated plants shall be significantly higher than that of the un-inoculated controls and at least 50 percent more than the controls.vii. The carrier material such as peat, lignite, peatsoil, humus favouring growth to be neutralized with calcium carbonate and sterilized shall be in the form of a powder capable of passing through 150 to 212 micron (72 to 100 mesh) IS sieve.viii. Specified mother culture be obtained from any recognized institution maintaining the mother cultures. The manufacturer may control the quality of the broth, it should get verified at least by two institutions as mentioned below:
Note. - At present National Bio-fertilizer Development centre (NBDC), Ghaziabad and its six Regional Centres located at Bangalore, Bhubaneshwar, Imphal, Hissar, Jabalpur and Nagpur,

Indian Agricultural Research Institute (IARI), New Delhi, Tamil Nadu Agricultural University (TNAU) Coimbatore, University of Agricultural Science, Bangalore are sources for supplying the mother culture.ix. The RI carrier shall be in the form of fribal (moist) with 30-40 percent (m/m) moisture content when tested as given in Annex-B.(b)Azotobacter Chroococcum Inoculants (AI) (IS 9138 - 2002)i. AI shall be carrier-based, the colour depending on the colour of the carrier.ii. AI shall contain a minimum of 10^7 viable Azotobacter cells/g of the carrier on dry - mass basis till 6 months expiry period from the date of manufacture. The number shall be counted by the plate count method as given in 4.2 of 1 A of part B of Schedule II and Azotobacter Chroococcum colonies are gummy, raised with or without striations, viscous and often sticky. The pigmentation varies from very light brown to black. Count the colony number and observe the cyst formation as given Part B - Schedule II (4.2) and calculate number per gram of the carrier material.iii. AI shall have a maximum of six months expiry period from the date of manufacture.iv. AI shall have no contamination with other microorganisms at 10^5 dilution.v. The pH of AI shall be between 6.5 and 7.5 when tested as given in-A.vi. The carrier material such as peat, lignite, peat soil, humus favouring growth to be neutralized with calcium carbonate and sterilized shall be in the form of a powder capable of passing through 150 to 212 micron (72 to 100 mesh) IS sieve.vii. Specified mother culture be obtained from any recognized institution maintaining the mother cultures. The manufacturer may control the quality of the broth, it should get verified atleast by two institutions as mentioned in VIII of 1 of part A of Schedule-I.viii. The AI carrier shall be in the form of fribal (moist) with 30-40 percent (m/m) moisture content when tested as given in Annexure-B.C. Azospirillum Inoculants (ASI) (IS 14806-2000)i. ASI shall contain 10^7 viable Azospirillum cells / g of the carrier material on dry mass basis.ii. ASI shall have no contamination with other microorganisms at 10^5 dilution. ASI contamination in semi solid medium should be checked by semi dilution and spread plate method with solid complete medium.iii. The pH of ASI shall be 6.5 to 7.5 when tested as given in Annexure-A.iv. The ASI carrier shall be in the form of fribal (moist) with 30-40 percent moisture. When tested as given in Annexure-B.v. ASI shall show effective root development on all cultivars / crops against which the inoculant is intended to be used.vi. Specified mother culture be obtained from any institution maintaining the mother cultures. The manufacturer may control the quality of the broth, it should get verified atleast by two institutions as mentioned in VIII of I of Part A of Schedule - I.

2. Phosphate Solubilising Bacterial Inoculant (PSBI) (IS 14807-2000)

i. PSBI shall contain 10^7 available phosphate solubilising bacterial cells / g of the carrier material on dry mass basis.ii. PSBI shall be carrier based colour depending on the colour of the carrier. Carrier material such as peat, lignite charcoal may be used. It shall be neutralized with calcium carbonate and then sterilised. When tested it shall pass through 100 micron sieve.iii. PSBI shall have no contamination with other microorganisms at 10^5 dilution.iv. The pH of PSBI shall be 6.5 to 7.5.v. The PSBI carrier shall be in the form of fribal (moist) with 30-40 percent (m/m) moisture content when tested as given in Annexure-B.vi. PSBI shall have phosphate solubilising capacity in the range of minimum 30 percent in terms of zone formation minimum 10 mm solubilisation zone in a prescribed solid medium having at least 3 mm thickness, when tested by the method prescribed in Annexure-C.vii. Specified mother culture be obtained from any recognized institution maintaining the mother culture. The manufacturer may control the quality of broth, it should get verified at least

by two institutions mentioned in VIII of I of Part A of Schedule-I.

I

Part B – Packing, Marking and Storage

1. Rhizobium:

1. Packing. - RI shall be packed material of low density polyethylene / polypropylene bags thickness of which shall be 75-100 micron minimum.

2. Marking. - Each packet shall be marked legibly to give the following information:

i. Name of the product, specifically as Rhizobium inoculants.ii. Leguminous crop for which intended.iii. Name and address of the manufacturer.iv. Type of the carrier.v. Batch or code number.vi. Date of manufacture.vii. Date of expiry (agreed between the manufacturer and the purchaser subject to minimum 6 months from the date of manufacture).viii. Net quantity and the area meant for.ix. Storage instructions worded as under : Store in Cool Place Away from Direct Sun and Heat.x. Any other information.

3. Item (ii), (vi) and (vii) shall be printed on a colored ink background.

4. Directions for the use of RI shall be printed briefly on the packet as given in Annexure D. A Separate pamphlet may preferably be given with it.

5. The product may also be marked with the standard mark.

6. The use of the standard mark is governed by the provisions of the Bureau of Indian Standards Act, 1986 and the rules and regulations made thereunder. The details of conditions under which the licence for the use of the standard Mark may be granted to manufacturers or producers may be obtained from the Bureau of Indian Standards.

7. RI shall be stored by the manufacturer in a cool and dry place away from direct heat preferably at a temperature of 15o C to 30o C. It shall also be the duty of the manufacturer to instruct the retailers and, in turn the users about the precautions to be taken during storage.

2. Azotobactor:

Packing:

1. AI shall be packed in packaging material of low density polythene / polypropylene bags thickness of which shall be 75-100 micron minimum.

Marking:

2. Each packet shall be marked legibly to give the following information,-

a. Name of the product, specifically as Azotobactor inoculant;b. Non-leguminous crop for which intended;c. Name and address of the manufacturer;d. Type of the carrier;e. Batch of code number;f. Date of expiry (agreed between the manufacturer and the purchaser subject to minimum 6 months from the date of manufacture);g. Net quantity and rate of application;h. Storage instructions worded as under Store in Cool Place away from Direct Sun and Heat;i. Any other information.

3. Directions for the use of AI shall be printed briefly on the packet as given in Annexure - D. A separate pamphlet may preferably be given with it.

4. The product may also be marked with the standard mark.

5. The use of the standard mark is governed by the provisions of the Bureau of Indian Standards Act, 1986 (Act No.63 of 1986) and the rules and regulations made thereunder. The details of conditions under which the licence for the use of standard mark may be granted to manufacturers or producers may be obtained from the Bureau of Indian Standards.

6. AI shall be stored by the manufacturer in a cool and dry place away from direct heat preferably at a temperature of 15o C to 30o C. It shall also be the duty of the manufacturer to instruct the retailers and, in turn, the users about the precautions to be taken during storage.

3. Azospirillum

Packing:

1. ASI shall be packed in polyethylene packs, thickness which shall not be less than 75 - 100 micron.

Marking:

2. Each polyethylene packs shall be marked legibly and indelibly with the following information,-

a. Name of the product, specially as Azospirillum inoculant. b. Name and address of the manufacturer. c. Crop (S) for which intended. d. Type of the carrier used. e. Batch number. f. Date of manufacture. g. Expiry date which shall not be less than 6 months from the date of manufacture. h. Net mass in kg and area meant for. i. Storage instructions worded as under: STORE IN COOL PLACE AWAY FROM DIRECT SUNLIGHT AND HEAT. j. Any other information required under the Standards of Weights and Measures (packaged commodities) Rules 1977.

3. Direction for use of ASI shall be printed briefly on the packets as given in Annexure-D of the standard. A separate pamphlet may preferably be given with it.

4. The product may also be marked with the Standard Mark.

5. The use of the Standard Mark is governed by the provisions of Bureau of Indian Standards Act, 1986 and rules and regulations made thereunder. The details of conditions under which the licence for the use of standard mark may be granted to manufacturer or producers may be obtained from the Bureau of Indian Standards.

6. ASI shall be stored by the manufacturer in a cool and dry place away from direct heat preferably at a temperature of 20o C and not exceeding 30o C. It shall also be the duty of the manufacturer to instruct the retailers and, in turn, the users about the precautions to be taken during storage.

4. Phosphates Solubilising Bacterial Inoculant (PSBI)

Packing:

1. PSBI shall be packed in polyethylene packs, thickness of which shall not be less than 100 micron.

Marking:

2. Each polyethylene packs shall be marked legibly and indelibly with the following information,-

a. Name of the product, specially as Phosphate solubilising Bacterial inoculants.b. Name and address of the manufacturer.c. Crop (S) for which intended.d. Type of the carrier used.e. Batch number.f. Date of manufacture.g. Expiry date which shall not be less than 6 months from the date of manufacture.h. Net mass in kg and area meant for.i. Storage instructions worded as under: Store in Cool Place away from Direct Sunlight and Heat.j. Any other information required under the Standards of Weights and Measures (packaged commodities) Rules 1977.

3. Direction for use of PSBI shall be printed briefly on the packets as given in Annexure - D of the standard. A separate pamphlet may preferably be given with it.

4. The product may also be marked with the Standard Mark.

5. The use of the Standard Mark is governed by the provisions of Bureau of Indian Standards Act, 1986 and rules and regulations made thereunder. The details of conditions under which the licence for the use of standard mark may be granted to manufacturer or producers may be obtained from the Bureau of Indian Standards.

6. PSBI shall be stored by the manufacturer in a cool and dry place away from direct heat preferably at a temperature of 20o C and not exceeding 30o C. It shall also be the duty of the manufacturer to instruct the retailers and, in turn the users about the precautions to be taken during storage.

II

Part - A [See Section 21]Procedure for Sampling of Bio-fertilizers

1. General Requirements:

1.0In drawing, preparing and handling the samples, following precautions and directions shall be observed,-1.1Sampling shall be carried out by a trained and experienced person as it is essential that the sample should be representative of the lot to be examined.1.2Since the samples are also required for microbiological analysis, utmost care is necessary to avoid extraneous contamination while drawing and handling the samples and to preserve them in their original conditions till they are ready for examination in the laboratory.1.2.1. No preservation's or bactericidal / fungicidal agent shall be added to samples required for microbiological analysis.1.3Samples in their original un-opened packets should be drawn and sent to the laboratory. This will prevent possible

contamination of the samples during handling and also help in revealing the true condition of the material.1.4Intact packets shall be drawn from a protected place not exposed to dampness, air, light, dust or soot and transferred to clean containers.1.5The sampling appliances and sample containers shall be sterile.1.6All precautions shall be taken to protect the sample of the material being sampled, the sampling instruments and the sample container against adventitious contamination at the time of drawing the sample, opening containers and transferring the samples.

2. Sampling Equipment:

2.1A suitable scoop made of stainless steel may be used for drawing samples.2.2The sampling equipment shall be perfectly clean and sterile. It shall be properly sterilised by heating in a hot air oven at 160o C for not less than 2h or by auto-claving for not less than 20 min at 120o C and held in suitable containers to prevent re-contamination.

3. Scale of Sampling:

3.1Lot. - All units (containers in a single consignment of type of material belonging to the same batch of manufacture) shall constitute a lot. If a consignment consists of different batches of the manufacture the containers of the same batch shall be separated and shall constitute a separate lot.3.2Batch. - An inoculant prepared from a batch fermentor or a group of flasks (containers) constitute a batch.3.3For ascertaining conformity of the material to the requirements of the specification, samples shall be tested from each lot separately.3.4The number of packets to be selected from a lot shall depend on the size of the lot and these packets shall be selected at random and in order to ensure the randomness of selection.

4. Drawal of samples:

4.1Three (3) samples should be drawn separately from each lot as per 1.3 of part A of Schedule - II. One sample should be sent for analysis, one has to be handed over to the dealer under acknowledgment, and one will be treated as referee sample.4.2The samples should be put in a cloth bag which may be sealed as specified in Form K along with other details like sample no. / code no. which enables its identification.

II

Part - B [See Section 22]

1. A. Method of Analysis of Rhizobium Bio- fertilizers

1. Apparatus

1.1Pipettes Graduated 1 ml and 10 ml.1.2Dilution Bottles or Flasks.1.3Petri Dishes Clear, Uniform, flat - bottomed.1.4Hot-Air Oven. - Capable of giving uniform and adequate temperature, equipped with a thermometer, calibrated to read up to 250o C and with vents suitably located to assure

prompt and uniform heating.1.5Autoclave.1.6Incubator.1.7Hand Tally or Mechanical counting Device.1.8pH meter.

2. Reagents

2.1Congo Red - one percent aqueous solution.2.2Medium. - Use a plating medium of the following composition

Agar	20 g
Yeast Extract	1 g
Mannitol	10 g
Potassium hydrogen phosphate (K_2HPO_4)	0.5 g
Magnesium sulphate ($MgSO_4 \cdot 7H_2O$)	0.2 g
Sodium Chloride (NaCl)	0.1 g
Congo red	2.5 ml
Distilled water	1000 ml
pH	7.0

2.3Sterilising and preparation procedure for plates:2.3.1. Sterilise the sampling and plating equipment with dry heat in a hot air oven at not less than 160o C for not less than 2 hours.2.3.2. Sterilise the media by auto-claving at 120o C for 20 min. To permit passage of steam into and from closed containers when auto-claved, keep stoppers slightly loosened. Air from within the chamber of the steriliser should be ejected allowing steam pressure to rise.Preparation of Plating Medium and Pouring2.3.3. Prepare growth medium in accordance with the composition indicated in 2.2.2.3.4. Melt the required amount of medium in boiling water or by exposure to flowing steam in partially closed container but avoid prolonged exposure to unnecessarily high temperature during and after melting. Melt enough medium which will be used within 3h.Re-sterilisation of the medium may cause partial precipitation of ingredients.2.3.5. When holding time is less than 30 min, promptly cool the melted medium to about 45o C, and store until used, in a water bath or incubator at 43 to 45o C. Introduce 12 to 15 ml of liquefied medium or appropriate quantity depending on size of the petri dish at 42 to 44o C into each plate. Gently lift the cover of the dish just enough to pour in the medium, Sterilise the lips of the medium containers by exposure to flame.a. immediately before pouring,b. periodically during pouring, andc. when pouring is complete for each batch of plates, if portions of melted medium remain in containers and are to be used without subsequent sterilization for pouring additional plates. As each plate is poured thoroughly mix the medium with test portions in the Petri dish.2.3.6. By rotating and tilting the dish and without splashing the medium over edge, spread the medium evenly over the bottom of the plate. Provide conditions so that the medium solidifies with reasonable promptness (5-10 min) before removing the plates from level surface.

3. Preparation of Serial Dilutions for Plate Counts

3.1Dispense 30 g of Inoculant to 270 ml of sterile distilled or demineralized water and shake for 10 min on a reciprocal shaker or homogeniser. Make serial dilutions up to 10^{10} . Take 0.2 ml or

suitable aliquots of 106 to 109 dilutions using sterile pipettes and deliver to Petri dishes containing set medium as given in 2.1 and spread it uniformly. Invert the plates and promptly place them in the incubator.

4. Incubation of Plates

4.1 Label the plates and incubate at $28 \pm 2^\circ\text{C}$ for 3 to 5 days for fast growing Rhizobia and 5 to 10 days for slow growing ones. 4.2 Colony Counting aids. - Count the colonies with the aid of magnifying lens under uniform and properly controlled artificial illumination. Use a colony counter, equipped with a guide plate and rules in centimeter square. Record the total number of colonies with the hand tally. Avoid mistaking particles of un-dissolved medium or precipitated matter in plates for pin-point colonies. To distinguish colonies from dirt, specks and other foreign matter, examine doubtful objects carefully. 4.3 Count all plates but consider for the purpose of calculation plates showing more than 30 and less than 300 colonies per plate. Disregard colonies which absorb Congo red and stand out as reddish colonies. Rhizobium stands out as white, translucent, glistening and elevated colonies. Count such colony numbers and calculate figures in terms of per litre, of carrier. Also check for freedom from contamination at 108 dilution.

1. B. Method of Analysis of Azotobactor Bio- fertilizer

1. Apparatus. - same as 1 of 1 A of part B of Schedule - II.

2. Reagents:

2.1 Medium. - Use a plating medium of the following composition

Agar	20g
Sucrose ($\text{C}_{12}\text{H}_{22}\text{O}_{11}$)	20.0 g
Ferric sulphate ($\text{Fe}_2(\text{SO}_4)_3$)	0.1 g
Dibasic potassium phosphate (K_2HPO_4)	1.0 g
Magnesium sulphate ($\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$)	0.5 g
Sodium Chloride (NaCl)	0.5 g
Calcium carbonate (CaCO_3)	2.0 g
Sodium Molybdate (Na_2MoO_4)	0.005 gm
Distilled water	1000 ml
pH	6.8 to 7.2

2.2 Sterilising & preparation procedure for plates. - same as 2.3.1 and 2.3.2 of 1 A of Part B of Schedule-II
Preparation of Plating Medium and Pouring. - Same as 2.3.3, 2.3.4, 2.3.5 & 2.3.6 of 1 A of part B of Schedule - II.

3. Preparation of Serial Dilutions for Plate Counts. - Dispense 30 g of Inoculant to 270 ml of sterile distilled water and shake for 10 min on a reciprocal shaker. Make serial dilutions up to 10⁻¹⁰. Take 0.2 ml or suitable aliquots of 10⁻⁶ to 10⁻⁹ dilutions using sterile pipettes and deliver to Petri dishes containing set medium as given in 2.1 and spread it uniformly. Invert the plates and promptly place them in the incubator.

4. Incubation of plates:

4.1 Label the plates and incubate at 28 ± 30 °C for 4 to 6 days. 4.2 Colony counting aids. - Same as 4.2 of 1 A of part B of Schedule-II. *Azotobacter chroococcum* colonies are gummy, raised with or without striations, viscous and often sticky. The pigmentation varies from very light brown to black. Count the colony number and observe the cyst formation as given below and calculate number per gram of the carrier material. Grow the vegetative cells at 30 °C on Burks agar medium comprising sucrose 20 g, di-potassium hydrogen phosphate 0.64 g, di-hydrogen potassium phosphate 0.20 g; sodium chloride 0.20 g; calcium sulphate 0.05 g, sodium molybdate 0.001 g; ferric sulphate 0.003 g, agar 20 g and distilled water 1.000 ml. Look for vegetative cells after 18 to 24 h either by simple staining method or through a phase contrast microscope. Grow the cyst cells on Burks agar medium as given above with 0.3 percent n-butanol in place of the carbon source. Look for cyst formation after 4 to 5 days incubation.

1. C. Method of Analysis of Azospirillum Bio- fertilizer

1. Apparatus. - same as 1 A of Part B of Schedule II

2. Reagents:

2.1 Medium. - Use a plating medium of the following composition

Malic acid	5.0 g
Potassium hydroxide	4.0 g
Di-potassium hydrogen phosphate	0.5 g
Ferrous sulphate	0.05 g
Manganese sulphate	0.01 g
Magnesium sulphate	0.1 g
Sodium chloride	0.2 g
Calcium chloride	0.1 g
Sodium Molybdate	0.002 g
Distilled water	1000 ml
Boromothymol blue (0.5 % alcoholic solution)	2.0 ml

Agar

1.7 g

pH adjusted to 6.5 - 7.0

2.2 Sterilising & preparation procedure for plates. - same as 2.3.1 and 2.3.2 of 1 A of Part B of Schedule-II
Preparation of Plating Medium and Pouring. - Same as 2.3.3, 2.3.4, 2.3.5 & 2.3.6 of 1 A of Part B of Schedule - II

3. Preparation of Serial Dilutions for Plate Counts. - same as 1 B of Part B of Schedule - II

4. Incubation of plates:

4.1 Label the plates and incubate at 28 +/- 30 C for 4 to 6 days. 4.2 Colony counting aids: Same as 4.2 of 1 A of Part B of Schedule-II
Counting the tubes or plates which have turned blue in colour after inoculation and ascertain the presence of pellicle's in undisturbed medium. To determine usual contamination on the same examine doubtful objects carefully. Count all plates / tubes which have turned blue and consider them for the purpose of calculation. Count such type of tubes / plates and tally this count with MPN table Annexure-E to get the number of cells per gram of the carrier.

Azospirillum Count/ g of carrier | = | MPN table value x Dilution level
Dry mass of the product

1. D. Method of Analysis of Phosphate Solubilising Bacterial Bio-fertilizer

1. Apparatus. - same as 1 A of Part B of Schedule - I

2. Reagents:

2.1 Medium. - Use a plating medium of the following composition:

Glucose	10.0 g
Tri-calcium phosphate	5.0 g
Ammonium sulphate	0.5 g
Magnesium sulphate	0.1 g
Sodium Chloride	0.2 g
Yeast extract	0.5 g
Manganese sulphate	Trace
Ferrous sulphate	Trace
Distilled water	1000 ml
Agar	15.0 g

pH adjusted to 7 +/- 0.2

2.2 Sterilising & preparation procedure for plates. - same as 2.3.1 and 2.3.2 of 1 A of Part B of

Schedule-II Preparation of Plating Medium and Pouring. - Same as 2.3.3, 2.3.4, 2.3.5 & 2.3.6 of 1 A of Part B of Schedule-II.

3. Preparation of Serial Dilutions for Plate Counts. - same as I B of Part B of Schedule - II

4. Incubation of Plates:

4.1 Label the plates and incubate at $28 \pm 30^\circ\text{C}$ for 4 to 6 days. 4.2 Colony counting aids: Same as 4.2 of 1 A of Part B of Schedule-II Counting. - Count the total number of colonies on the plates including colonies with solubilisation zone with the help of a colony counter. Methods for counting solubilisation zones. Take 10 g of PSBI (BF) in 90 ml in water. b. Make a ten fold dilution series up to 10^{-7} . c. Take 0.2 ml aliquote of 10^{-5} to 10^{-7} dilution using sterile pipettes and delivered to Petri dishes containing pikowskeyi media. d. Spread it uniformly, Invert the plates and incubate them up to 2 weeks at $28 \pm 20^\circ\text{C}$. e. Count the colonies showing hallow cones and measure their diameter. Minimum acceptable zone is 10 mm in diameter. Guidelines On Maintenance and Preparation of Culture and Quality Control at Broth Stage

1. Rhizobium:

1. Maintenance of pure cultures:

1.1 Maintain pure cultures of rhizobia on yeast extract mannitol agar (YEMA) slants of the following composition.

Mannitol	10.0 g
Potassium hydrogen phosphate (K_2HPO_4)	0.5 g
Magnesium sulphate ($\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$)	0.2 g
Sodium chloride (NaCl)	0.1 g
Calcium Carbonate (CaCO_3)	1.0 g
Yeast extract	1.0 g
Agar	18.0 g
Distilled water	1 litre
pH	6.8-7.0

1.2 Transfer a loopful of the pure culture to each of the agar slants aseptically in an inoculation room and incubate at $28 \pm 20^\circ\text{C}$ for 3 to 10 days depending upon the species of Rhizobium. Always keep pure cultures at 40°C .

2. Preparation of Inoculum Cultures:

2.1 Prepare yeast mannitol broth of the composition as given in 1.1. minus the agar. 2.2 Transfer a

loopfull of the culture into a 100/250 ml conical flasks containing the broth. Incubate the flasks at 28 + 20 C on a rotary shaker for 2 to 6 days.

3. Quality Control Tests Recommended at Broth Stage:

3.1Qualitative Tests3.1.1. Check for freedom from visible contaminants3.1.2. The pH of the bacterial broth shall normally be between 6.5 and 7.53.1.3. Smear and Gram stain3.1.3.1. Reagentsa.

Ammonium oxalate crystal violet stain weigh 0.2 g of crystal violet and dissolve in 20 ml of 95 percent ethyl alcohol. Dissolve separately 0.8 g of ammonium oxalate in 80 ml of distilled water. Mix the two solutions and filter through a filter paper.b. Iodine solution

Iodine 1.00 g

Potassium Iodide 2.00 g

Distilled water 300 ml

Weigh the ingredients and dissolve in water. Filter through a filter paper.c. Erythrosine

Erythrosine 1.00 g

Phenol 5.00 g

Distilled water 100 ml

Weigh the ingredients and dissolve in water. Filter through a filter paper.3.1.3.2. Procedure. -

Prepare a smear on a clean microscope slide, fix over a flame by gentle and intermittent heating, air cool and flood with ammonium oxalate crystal violet stain for 1 min. After removing the excess of ammonium oxalate crystal violet, wash the slide under a gentle stream of running tap water. Flood the slide with iodine solution for half a minute remove excess stain wash with 95 percent ethyl alcohol and finally wash under a gentle stream of running tap water. Flood the slide with erythrosine stain for about 3 min, wash under a gentle stream of running tap water and dry between the folds of a filter paper. Examine the slide under a compound microscope using an oil immersion objective.Note. - A smear prepared from undiluted broth should be free from Gram positive cells.

The presence of a few gram positive cells in occasional fields which may be due to dead cells in the medium may be disregarded.3.1.4. Absence of Growth on Glucose - Peptone AgarThe composition of the glucose - peptone agar is as follows:

Glucose 10.0 g

Peptone 20.0 g

Sodium chloride (NaCl) 5.0

Agar (IS 6850) 15.0

Distilled water 1000 ml

Bromocresol purple ethyl alcohol solution 10 ml of 1.6 persons

pH 7.2

Note. - When a loopful of the broth is streaked into this medium and incubated at 28 +/- 20 C for 24 h, the purple - violet colour of the medium (due to the indicator bromocresol purple) shall not change. If the colour changes to yellow (acidic reaction) or blue (alkaline reaction) the broth is grossly contaminated. Hence, the broth should be rejected.3.1.5. Streak on yeast Extract mannitol Agar with Congo RedWhen a loopful of broth culture is streaked to a plate of this medium and

incubated at $28 \pm 20^\circ\text{C}$ for 3 to 10 days, it shall show colonies of bacteria with growth characteristics same as that of the pure culture used in the preparation of the broth. Otherwise, the broth should be rejected.

3.2 Quantitative Test

3.2.1. Viable or Plate Counts Serially dilute one milliliter of the broth to obtain dilutions of the order of 10^6 to 10^9 . Plate 0.2 ml aliquots of the dilutions on YEMA plates and incubate at $28 \pm 20^\circ\text{C}$ for 2 to 6 days, depending on the species of Rhizobium. The counts of viable Rhizobium in the final broth from shake culture or fermentors shall be not less than 10^6 to 10^6 cells / ml. Otherwise, the broth should be rejected.

2. Azotobactor

1. Maintenance of pure cultures:

1.1 Maintain pure cultures of Azotobactor on slants of the following composition

Agar	20 gm
Sucrose	20 gm
Ferric Sulphate	0.1
Dibasic Potassium Phosphate	1.0 gm
Magnesium Sulphate	0.5 gm
Calcium carboantare	2.0 gm
Sodium Molybdate	0.005 gm
Dis-tilliled water	1000 ml
pH	6.8 to 7.2

1.2 Transfer a loopful of the pure culture to each of agar slants aseptically in an inoculation room and incubate at $28 \pm 20^\circ\text{C}$ for 3 to 10 days depending upon the species of Azotobactor. Always keep culture pure cultures at 50°C .

2. Preparation of inoculum culture

2.1 Prepare Jenson's media broth of the composition as given in 1.1 minus the agar

2.2 Transfer a loop full of the culture into a 100ml/ 250 ml, conical flask containing the broth. Incubate the flasks at $28 \pm 20^\circ\text{C}$ on a rotary shaker for 2 to 6 days.

3. Quality control Tests recommended at broth stage.

3.1 Qualitative test

3.1.1. Check for free from contaminants by preparing slide and observing under microscope.

3.1.2. The pH by bacterial broth shall normally be between 6.5 to 7.0

3.1.3. Gram staining test shall be carried out as described in 3.1.3, 3.1.3.1 and 3.1.3.2 of Rhizobium of this standard.

3.2 Quantitative test

3.2.1. Viable cell count. - same as 3.2. of 1B of Part B of Schedule II

3. Azospirillum

1. Maintenance of pure cultures:

1.1 Maintain pure culture of Azospirillum on nitrogen free bromothymol blue medium and maintain as semi solid medium as described in 2.1 of this standard 1C of part B of Schedule II. 1.2 Transfer a loopful of pure culture to each of the agar culture tube aseptically in an inoculation room and incubate 28 +/- 20 C for three days and keep it undisturbed. Always keep pure culture below 50 C.

2. Preparation of Inoculum culture. - Inoculum culture shall be prepared as described in 2.1, 2.2 of Rhizobium of this standard.

3. Quality Control Test recommended at Broth Stage.

3.1 Qualitative Test: 3.1.1. Check for free from contaminants by preparing slide and observing under microscope. 3.1.2. The pH of bacterial broth shall normally be between 7.0 to 8.0. 3.1.3. Gram staining test shall be carried out as described in 3.1.3., and 3.1.3.1 & 3.1.3.2. of Rhizobium of this standard. 3.1.4. See the colour change in the media after 24 hours from inoculation. The colour will change from green to blue. 3.1.5. Watch the pellicle just below the surface of the media. It is checked on the third day after keeping inoculated broth undisturbed. 3.2 Quantitative Test: 3.2.1. Most Probable Number (MPN) as given in Annexure-E. The counts of Azospirillum in the final broth from shake culture or fermentors shall be not less than 10⁸ to 10⁹ cells / ml. Otherwise the broth should be rejected.

4. Phosphate Solubilizing Bacterial Inoculant (PSBI)

1. Maintenance of pure cultures:

1.1 Maintain pure culture of PSBI on the medium as described in 2.1 of 1 D of Part B of Schedule - II in the form of slants. 1.2 Transfer a loopful of pure culture to each of the agar slants aseptically in an inoculation room and incubate at 28 +/- 20 C for three days. Always keep pure culture below 50 C.

2. Preparation of Incoculum culture. - Inoculum culture shall be prepared as described in 2.1,

2.2 of Rhizobium changing the media composition as mentioned in 2.1 of this standard.

3. Quality control test recommended at Broth Stage:

3.1 Qualitative Test. 3.1.1. Check for free from visible contaminants by microscope and observing solubilisation zones. 3.1.2. The pH of bacterial broth shall normally be between 6.5 to 7.0. 3.1.3. Gram staining test shall be carried out as described in 3.1.3, 3.1.3.1 and 3.1.3.2 of

Rhizobium.3.2Quantitative Test:3.2.1. Viable cell count serially dilute one milliliter of broth plate 0.2 ml aliquots of the dilutions on pikowkyasi media (as given in 2.1 of 1 D of Part B of Schedule II) plates and incubate at 28 +/- 20 C for 2 to 6 days. The counts of PSBI in the final broth from shake culture or fermentors shall be not less than 10⁸ to 10⁹ cells/ml. Otherwise, the broth should be rejected. Annexure - A Determination of pH

1. Make suspension of 20 g of the ASI into 50 ml of distilled water and shake on a rotary shaker for 2 hours. Filter this suspension and determine the pH of the filtrate with the help of pH meter.

Annexure - B Determination of Moisture of Bio-fertilizer Packets (Method) 2.1 Heat 10 g of sample for 12-16 hours in an air oven at 100 - 105°C, in a desiccator and weigh. The loss in weight represents the moisture. Calculate the moisture percentage on air dry weight basis, by multiplying the loss in weight by ten. Annexure - C Determination of Soluble Phosphorus using Ascorbic

Acid. Principle Soluble phosphorus forms heteropoly molybdo-phosphate complex with molybdate ions which on reduction produces blue colour measured at 840 to 880 nm. Considering the higher stability of the ascorbic acid, easiness to handle, higher tolerance to the concentration of interfering ions, possibilities to use it with all types of acids and higher stability of the developed colour (10 to 60 min), ascorbic acid instead of stannous chloride is now-a-days used as the reducing agent for the heteropoly molybdophosphate complex formed by the soluble phosphate ions on addition of ammonium molybdate solution. Apparatus Spectrophotometer capable of transmission measurements at 840 to 880 nm. Reagents Ammonium Molybdate (NH₄)₆ MO₇O₂₄ 4H₂O I - Ascorbic acid P - Nitrophenol

4NH.

2SO.

4.

Preparation of Reagents. Sulphomolybdic acid. Take 20 g of Ammonium molybdate and dissolve in 300 ml of distilled water. Add slowly 450 ml of 10 N₂SO₄. Cool the above mixture and add 100 ml of 0.5 percent solution of Antimony potassium tartrate. Cool and make the volume to one litre. Store in glass bottle away from direct sunlight. Preparation of mixed Reagent. Add 1.5 gm of L - ascorbic acid in 100 ml of the above stock solution and mix. Add 5 ml of this solution to develop colour. Mixed reagent is to be prepared fresh as it does not keep for more than 24 h. Procedure. Weigh the required material in a 100 ml conical flask. Add 50 ml of extractant and shake it for 30 min on rotary shaker. Filter the suspension through Whatman filter paper No. 40. If the filtrate is coloured then add a tea spoon of Darco-60 (activated phosphorus free carbon) re-shake and filter. Take a known aliquot (5 to 25 ml) of the extract in a 50 ml volumetric flask. Add 5 drops of P - nitrophenol indicator (1.5 percent solution in Water) and adjust the pH of the extract between 2 and 3 with the help of 4NH₂SO₄. The yellow colour will disappear when the pH of the solution becomes 3. Swirl gently to avoid loss of the solution along with the evolution of CO₂. When the CO₂ evolution has

subsided, Wash down the neck of the flask and dilute the solution to about 40 ml. Add 5 ml of the sulphomolybdic acid mixed reagent containing ascorbic acid. Swirl the content and make up the volume. Measure the transmission after 30 min. at 880 nm using red filter. The blue colour developed remains stable up to 60 minutes. Record the concentration of Phosphorus (P) in the extract from the standard curve and calculate the concentration of soluble phosphorus as follows. Calculation.

- | | |
|--|---------|
| (a) Weight of the substance taken | = x g |
| (b) Volume of the extractant added | = 50 ml |
| (c) Volume of the extract taken for determination. | = y ml |
| (d) Volume made after colour developed | = 50 ml |
| (e) Reading from the standard curve against percent transmission recorded. | = z ppm |
| (f) Soluble phosphorus. | |

$$\text{Percent P} = \frac{Z \times 50 \times 10^{-6} \times 50}{Y \times X} \times 100$$

Preparation of standard curve: prepared standard curve using 0.1 to 0.6 ppm P in 50 ml volumetric flask. Plot the standard curve by taking concentration of soluble P on x-axis and percent T on y-axis using a semi-log graph paper. It is a straight line relationship between the soluble P and percent T when plotted on semi-log graph paper.

1. The contents of the packet are sufficient for seeds to be sown in the area indicated on the package.

2. Use only for the leguminous crops mentioned, before the expiry date and do not expose to direct sun light or heat.

3. Mix the inoculants with the seeds gently with the minimum amount of water, taking care to avoid damage to seed coat. Dry the inoculated seeds under shade over clean paper or gunny bag and sow immediately.

4. This is not a chemical fertilizer and hence do not mix inoculated seeds or RI with chemical fertilizers.

Azotobactor

1. Use only for the non-leguminous crops and before the expiry date.

2. The contents of the packet are sufficient for seeds to be sown in 0.4 hectare.

- 3. This is not a chemical fertilizer, hence do not mix it or the inoculated planting material with chemical fertilizers or pesticides.**
- 4. Use for the crops specified on the packet.**
- 5. Do not expose to direct sunlight or heat.**

Azospirillum

- 1. The contents of the packet are sufficient enough to the given area to be broad casted or given seedlings for root dipping depending on the specified crops as denoted in the packet. Mix the inoculants with seeds gently with the minimum amount of water, taking care to avoid damage to seed coat. Dry the inoculated seed under shade over clean surface gunny bag and sow them immediately.**
- 2. Use only for the crops mentioned paddy, *Azospirillum brasillense* for other crops like millets, etc use crop specific strain. Use before the expiry date and do not expose to direct sun light or heat.**
- 3. ASI is not a chemical fertilizer hence do not mix inoculated seeds or ASI with agro-chemicals.**

Phosphate Solubilising Bacteria.

- 1. The contents of the packet pre sufficient enough to the given area to be broadcast or given seedlings for root dipping depending on the specified crops as denoted on the packet. Mix the inoculants with seeds gently with the minimum amount of water, taking care to avoid damage to seed coat. Dry the inoculated seed under shade over clean dry paper organic bag and sow them immediately.**
- 2. In order to solubilise fixed soil phosphate use PSBI for all type of crops. Use before the expiry date and do not expose to direct sunlight or heat.**
- 3. PSBI is not chemical fertilizer hence do not mix inoculated seeds or PSBI with agro-chemicals.**
