2. [Amended by THE AIRCRAFT (AMENDMENT) ACT, 2020 (MINISTRY OF LAW AND JUSTICE 13 of 2020) on 19 September 2020]

The Aircraft Act, 1934(22 OF 1934)Statement of Objects and Reasons.-Aerial navigation in British India is at present governed by the Indian Aircraft Act, 1911, and the rules made thereunder. In 1919 an International Convention for the regulation of aerial Navigation was signed by the plenipotentiaries of 27 countries with the object of establishing regulations of universal application and of encouraging peaceful intercourse with nations by means of aerial communications. To this Convention India was a signatory. The Convention deals with all questions relating to international aerial navigation, and also provides for the institution of a permanent International Commission for Air Navigation with very wide powers as regards the formulation of rules for the marking of aircraft, the grant of certificates, rules of the air and so forth. This Commission meets from time to time to amend the annexes of the Convention, which contain the detailed rules to be observed by the aircraft of all signatory States and by all aircrafts when within the borders of those States. For some years past the inadequacy of the Indian Aircraft Act, 1911, has been increasingly felt, and the stage has now been reached where it is no longer possible to control air traffic efficiently, or to implement India's international obligations without fresh legislation. The present Bill, therefore, is designed to enlarge the rule making powers of the Governor-General in Council in order to meet modern developments to enable Government to give full effect to the provisions of the International Convention and its annexes, and to provide for certain other matters on which legislation has become necessary. Amendment Act 1 of 1983-Statement of Objects and Reasons.-Section 5 of the Aircraft Act, 1934 empowers the Central Government to make rules providing inter alia for the regulation of air transport services and the authorities by which powers conferred by or under the Act may be exercised. The committee on subordinate legislation of the Sixth Lok Sabha (12th Report) have recommended that the section might be suitably amended so that authority expressly flows therefrom for authorising the Director-General of Civil Aviation to approve, disapprove or revise the fares, etc., of the tariffs of operators of air transport services. It is proposed to give effect to this recommendation by amending sub-section (2) of section 5 of the Act so as to enumerate

therein expressly the matters mentioned by the Committee and all other important matters regarding the economic regulation of civil aviation and air transport services and matters with respect to which rules may be made under the section.² It is proposed to avail of the present opportunity to amend section 14-A of the Act relaxing the laying of rules before Parliament so as to bring the same into conformity with the latest formula on the subject as approved by the committee on subordinate legislation.

Amendment Act 69 of 1985-Statement of Objects and Reasons.-Section 14 of the Aircraft Act, 1934, as originally enacted provided that the power to make rules conferred by the Act "is subject to the condition of the rules being made after previous publication for a period of not less than three months". As a result of this provision, except in cases falling under section 8-B of the Act, it was not possible to make rules for the purposes of the Act without previous publication of the same for a period of not less than three months.² In connection with the formal investigation into the accident involving that crash of Air India's Boeing 747-237-B Aircraft VT-EFO "Kanishka" on the 23rd June, 1985 in the North Atlantic sea, the Court holding the investigation recommended that the Aircraft Rules, 1937 should be amended without delay to facilitate the holding of some of the proceedings of the Court in camera. In view of the urgency of the matter and with a view to covering all contingencies in which it may not be practicable to comply with the condition of previous publication for three months, the President promulgated on the 16th October, 1985 the Aircraft (Amendment) Ordinance, 1985 for substituting for section 14 of the Act a new section. The new section retains the condition of previous publication of rules made under the Act without laying down any minimum period of such publication. It also empowers the Central Government to dispense with, in the public interest, the condition of previous publication in any case.

Amendment Act 51 of 2000-Statement of Objects and Reasons.-The movement of a cargo in India is, at present, subjected to physical examination, X-ray screening, or 24 hours cooling off. These security procedures prescribed for the movement of cargo entail wastage of time and energy since the consignment cannot be straightaway carried into the aircraft.² It has been felt over a period of time that the above procedure is tedious and has been hindering the speedy movement of air cargo. With a view to remedying the situation, the Government of India has decided to introduce the scheme called the "Known Shippers" under which the prescribed security measures could be adopted by the identified "Known Shippers" at their own site and cargo consignment could be accepted directly by air carriers on the basis of their certification stating that the consignment is safe for air transportation.³ The implementation of the scheme will be subject to satisfactory observance of security norms by the "Known Shippers". In order to enforce the scheme, a notification will be issued by the Commissioner of Security (Civil Aviation) under section 5-A of the Aircraft Act, 1934, in consultation with the Central Government. The violation of directions issued under the said notification shall be punishable under section 11-A of the said Act. As the punishment provided under section 11-A is not deterrent enough, it is proposed to amend that section so as to enhance the upper limit of fine from one thousand rupees to ten lakh rupees.

Amendment Act 44 of 2008-Statement of Objects and Reasons.-At present the Central Government through various provisions of the Aircraft Act, 1934 and the rules made thereunder exercises control in respect of manufacture, possession, use, operation, sale, import and export of civil aircrafts and licensing of aerodromes.² In the last two decades, significant developments have taken place in the civil aviation sector in India. The domestic air transport services were opened to the private sector in 1994 and the management and operation of the airports, the navigation, communication facilities and the air traffic control at airports were transferred to the Airports Authority of India with effect

from the 1st April, 1995. Now, with vast developments in technology, communication, navigation, surveillance and air traffic management are switching over from ground based to satellite based technology. As a result of these developments, a need has arisen to lay down appropriate safeguards to ensure protection of civil aviation against acts of unlawful interference.³ Keeping in view the above aspects as well as standards laid down by the International Civil Aviation Organisation (ICAO) for safety and security of civil aviation and also to give effect to various provisions of the Convention on International Civil Aviation popularly known as Chicago Convention, certain amendments are proposed to be made to the Aircraft Act, 1934.⁴ The Aircraft (Amendment) Bill, 2006, inter alia, seeks-(a) to regulate foreign registered aircraft which is for the time being operating in or over India;(b) to empower the Central Government for(i) licensing of personnel engaged in air traffic control;(ii) certification, inspection and regulation of communication, navigation and surveillance and air traffic management;(iii) safeguarding civil aviation against acts of unlawful interference and to ensure civil aviation security; and(iv) investigation of incident alongwith accident;(c) to empower the Director-General of Civil Aviation for performing safety oversight functions;(d) to impose penalty for contravention of the provisions of the Chicago Convention;(e) to enhance quantum of existing penalties for violation of rules relating to carriage in aircraft of arms of explosives or providing false information or abetment of offences or non-compliance of directions with a view to achieve desired deterrent effect which would go a long way in raising the compliance level;(f) to enlarge the scope of the powers of Director-General of Civil Aviation.[19th August, 1934]An Act to make better provision for the control of the manufacture, possession, use, operation, sale, import and export of aircraft.WHEREAS it is expedient to make better provisions for the control of the manufacture, possession, use, operation, sale, import and export of aircraft;It is hereby enacted as follows:--
